

PVT Pro New Features Version 2018.1

- Definition of Three-Phase Flash Test
- Adding Experimental Saturation Points When Comparing Phase Envelopes Plots
- Export to Aspen HYSYS V.10
- MMP Calculation Using Multiple Mixing Cell Method
- MMP Calculation Using Semi Analytical Tie-Line Method
- Showing Test Brief Review as Tooltip Comment
- Calculation of Interfacial Tension (Pendant Drop Method)
- Asphaltene Precipitation Modeling (PC-SAFT Model)
- API Gravity Added to Density Units
- Improvements in Slim Tube Experiment Simulation Procedure
- Warning on Selection of Properties of Pure Components as Regression Parameters
- Procedure of Phase Envelope Plotting Improved For Samples Containing Non-HC Components
- Helium Existence in Mixture Problem Solved
- Export to PROSPER
